**BUILDINGS AND MONUMENTS,**
MODERN AND MEDIÆVAL,
Being Illustrations of the Edifices of the Nineteenth Century, and of some of the Architectural Works of the Middle Ages.
By GEO. GODWIN, F.R.S.
Fellow of the Institute of Architects; Corresponding Member of several Societies.

OPINIONS OF THE PRESS.

"The bold and effective woodcuts which have now appeared for some years past in the weekly sheets of our excellent contemporary *The Builder*, must be familiar to all who are the least interested in architecture, if to none other than the admirable manner in which believers of the 'illuminated' present in the windows of the newsvendors. It will, we are sure, be very acceptable to such as set a higher value upon these prints than the ephemeral pleasure they give on their first appearance, to have smooth and well-printed impressions at a very moderate price. In the publication now before us, with the advantages of plenty ink and toned paper they assume a dignity which some persons will be inclined to regard as ornate, who are not fully aware of the great importance of good printing in wood engravings."—*Gentleman's Magazine.*

"This cheap and handsome re-issue of the principal cuts which have appeared from time to time in *The Builder* is an exceedingly useful addition to Mediæval Portfolios. It is to be hoped it will be read and purchased by many who have no connection with building: there are, however, a class who are not aware of the value or curiosity of its many engravings, and such persons will no doubt avail themselves of the handsome re-issue of them, printed on a better paper and with greater care, and accompanied with a proper amount of descriptive letter-press."—*Art Journal.*

"A publication of much merit and interest. The articles are elaborate and valuable, the engravings excellent."—*The Literary Gazette.*

"The idea of republishing in a separate and handsome form some of the best architectural subjects that have been given in *The Builder* was a good one. Besides being thus beautifully executed within a comparatively small and convenient compass, prepared from unobtrusive mediums of tone, and carefully printed on toned paper, the woodcuts are so greatly improved in appearance that they scarcely seem to be from the same blocks as before. The same illustrations, of the same number of them, could not have been brought out at the same price had not the blocks been already of second, and had they not served their purpose in a periodical having secured sale."—*The Athenæum.*

"Unparalleled in the artistic world for cheapness as well as for utility and beauty of effect." "It is among the cheapest and the best works of the kind ever published."—*The Observer.*

"This ought to be supported by public patronage. It is certainly at once a very moderate price, a great quantity and variety of entertainment in the way as well as to the mind than has hitherto been attained by publication. It appears to us a judicious plan, the making new buildings, together with others of older date."—*The Globe.*

"This is a happy idea, most skilfully carried out. Fine printing, and a deep yellow paper, give a most charming effect to these vigorous and faithful illustrations of the edifices of the nineteenth century, and of some of the architectural works of the Middle Ages; and the work will thus probably fall in the hands of thousands who have no popular book of consecutive information on modern architecture. Mediæval structures, moreover, have rarely been more effectively treated."—*Gloucestershire Chronicle.*

Now ready, in 1 vol. 8vo. with Illustrations, price 12s. cloth,

**THE CHURCHES OF THE MIDDLE AGES.**

By HENRY BOWMAN and JOSEPH H. CROWTHER, Architects, Manchester.

To be completed in Twenty Parts, each containing six plates, imperial folio, issued at intervals of two months. Plates per part to subscribers—proofs, large paper, 12s.; United, small paper, 6s.; plates, 4s. Parts 1 to 14, are now published, and contain illustrations of Ewerby Church, Lincolnshire; Temple Balsall Chapel, Warwickshire; Heckington Church, Lincolnshire; Clee Church, Norfolk; and Tirpeddington Church, Lincolnshire.

"Every is a magnificent specimen of a drawing and illuminated church. It is most perfectly constructed and described; one can follow the most recondite beauties of the construction, mouldings, and pillars in these plates, almost as well as in the original pictures. Such a monograph as this will be of incalculable value to the architects of our Colonies or the United States, who have no means of access to general education. The plates are in style done with remarkable skill and distinctness. Mr. Hawkins has chosen only the most picturesque view from the points and presents a very fine display of beauty; we can hardly conceive anything more perfect. We heartily recommend this series to all who are about to paint mediæval."—*Ecclesiologist*, Oct. 1850.

**DIRECTIONS for MAKING JOINTS in GUTTA PERCHA** attaching to metal, as with lead of pipes, &c. to be had gratis on application to the GUTTA PERCHA COMPANY, Patentees, 18, WHARF-ROAD, CITY-ROAD.

**GUTTA PERCHA TUBING.**—May be buried for years, with no injury, and it is therefore valuable for covering the water, chemicals, &c. It is particularly valuable for liquid manure, drain, and soil pipes. Being a non-conductor, it is not affected by the frost of winter or drought of summer, like metal or leather. Its strength is extraordinary: the small half-inch diameter tubing stood an unbroken pressure of 300 lbs. on the square inch, without bursting. The smaller sizes may be had in 100 feet, and the larger in 50 feet lengths. The joints are easily made. As a conductor of sound it is most valuable for conveying messages to Box of bells. Every variety of articles manufactured by the Gutta Percha Company, Patentees, 18, Wharf-road, City-road, London; and sold by their wholesale dealers.
